

## Remarks on the reports

This is a written exam. Accepted languages are french and english. You are requested to return to me a report (hand-written or computer-written) where you give solutions of the exercises. Give as much details as possible about the solution, explain in detail which results from the lecture notes you use. I will appreciate if you make the report as self contained as possible. If you have problems with the solution you can ask me for help. This will be accounted for in the final note. So please review the lecture notes and be sure to have understood the course before come to me to ask aid. In the final note I will judge your understanding of the subject matter, your rigour in the mathematical arguments, the clarity of the exposition in the report. When you will return the report I will ask you questions about it and the answers will affect the final grade.
